

A minimal L^AT_EX article

Anjana Vakil

November 19, 2015

Hello World! This is a little L^AT_EX document.

1 An interesting topic

This is where I would have some text. Oh how beautiful this text is. This is where I would have some text. Oh how beautiful this text is. This is where I would have some text. Oh how beautiful this text is. This is where I would have some text. Oh how beautiful this text is. This is where I would have some text. Oh how beautiful this text is.

I could start another paragraph and it could contain a citation [1]. Then the rest of the paragraph would continue. Then the rest of the paragraph would continue. Then the rest of the paragraph would continue. Then the rest of the paragraph would continue.

2 Another topic

I could reference the previous section like this (see section 1). Then the rest of the paragraph would continue. Then the rest of the paragraph would continue. Then the rest of the paragraph would continue. Then the rest of the paragraph would continue.
